

Type: Roll Feeder

SPEC sheet

Conveyor, Grading and Cleaning System

Ideal for diced tomatoes

The Protec Roll Feeder is the latest in efficient conveyor systems specifically designed for diced tomatoes. It contains a series of rollers which can be adjusted manually to the desired distance in order to perform a wide variety of functions.

Functions of the Roll Feeder include; grading diced product, draining and cleaning, eliminating seeds, water and small unwanted objects, as well as, homogeneous distribution of the product

In addition to improving the quality of the product, the Roll Feeder is an ideal addition to the Aspirx or Dixair optical sorting systems for all your tomato processing requirements.

Machine Spec:

Can be integrated to the Aspirx and DixAir

Different models available

14 or 28 rollers
