

Pro-KB Knocking Belt

Projx Services are delighted to launch the new **PRO-KB** foreign body removal belt. Many companies worldwide are struggling with a simple and effective way to remove stones, mud lumps, insects, snails, wood and plastic from the high quality end product being offered to their customers. However, we now have the solution to this problem. By adding this simple knocking belt as an off-line or continuous in-line process, you will have the ability to remove foreign bodies from your good product prior to washing.

In-line Foreign Body Removal

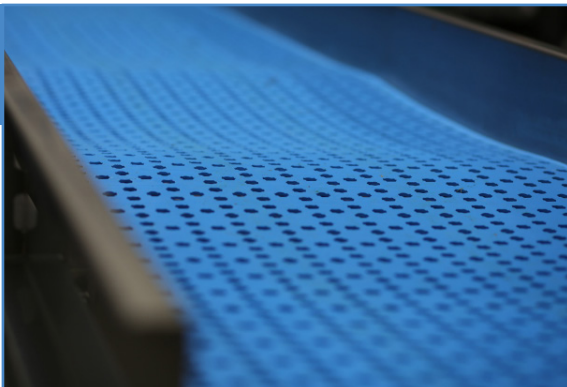

The **PRO-KB** controls are designed to be fully flexible so you can automatically sort and inspect very delicate baby leaf products through to more durable cut leaf and vegetables on the same machine.

Gentle Handling of Salad

- Side loading, quick change endless belt
- Extended overhang to improve feed into wash line
- Integral crate collection
- Mobile for easy integration into other lines
- Robust infeed crate bars for easy decanting
- Fully adjustable knocking device to control how gentle or aggressive to suit different product types
- Variable speed belt
- Large foreign body removal area
- Even feed with different hole size to suit various applications

Easy Clean, Quick Change Belt
